## ADL Trident II and Enviro 400 Air Dryer Improvements – LA8050

Knorr-Bremse strives for continuous improvement across all elements of our business, including the crucial area of product design. The LA8050 Air Dryer, fitted to ADL Trident II and Enviro 400 vehicles, has been redesigned and enhanced to improve vehicle operation.

The regeneration ratio of the new LA8050 has been increased. This means that a larger volume of clean air is used to purge the desiccant of impurities, thereby improving the cleanliness and dryness of the air brake system.

The new LA8050 air dryers have been available since March 2010, and are date code stamped. Please note that "reconditioners" and "repairers" will only be able to provide old, unimproved product. To guarantee you are buying the new and improved version of the air dryer you must purchase from an Approved Knorr-Bremse Distributor.

### Redesigned and Improved Air Dryer LA8050

- Increased Regeneration Ratio
- Available since March 2010, Date Code Stamped
